PROGRAM GOALS

This program is designed to provide a unique global perspective of important medical topics in research and development in the fields of Ophthalmology and Otolaryngology.

EDUCATIONAL OBJECTIVES

At the conclusion of the meeting, participants will be able to:

- Define new approaches to patient treatment.
- Appraise performance and outcomes of patient care.
- Apply new research in patient care.
- Manage and appropriately treat diseases of the eye and head and neck.
- Analyze treatment options for ocular and periocular diseases.
- Identify patients at a risk for complications of thyroid surgery.
- Assess and reduce complications associated with thyroid surgery.
- Assess the clinical indications for orbital decompression and provide an overview of the surgical techniques.
- Evaluate sinonasal neoplasms and their indications for treatment from both a therapeutic and surgical approach.
